SKILLS

Languages: Java, MSSQL, PowerShell, C#, Bash, Groovy, Python

Tools: Apache Karaf, SSIS, GIT, Jenkins, Maven, JBoss Fuse, Mulesoft

Cloud: Salesforce CRM, Marketo Lead Database, Google Cloud Platform, Azure, Databricks

Certifications: GCP Cloud Digital Leader, AWS Cloud Data Practitioner

EXPERIENCE

Data Engineer • United Parcel Service

May 2021 - Feb 2024

- Implemented Contact Mastering pipeline using BigQuery and Elasticsearch to fuzzy match and master over 100M+ contact records
- Developed Jenkins pipelines for automated versioning and deployment of 40+ SSIS packages and 100+ stored procedures, with SonarQube code quality validation
- Analyzed alternative sources for 14M+ email-to-account relationships with Databricks and Azure to sunset legacy applications; presented findings to marketing leadership
- Migrated 120M+ GDPR-compliant contact preference records from legacy systems into SAP data granting the cost-effective modernization of an on-prem application
- Implemented a streaming pipeline to synchronize 20k+ records per hour, enabling more immediate and accurate marketing campaigns
- Led 10+ interns and new hires by delegating tasks, creating training materials, and authoring technical documentation to support development delivery

Software Engineer • United Parcel Service

Sept 2019 - May 2021

- Conducted software evaluation for Mulesoft ESB and Anypoint Platform iPaaS, complete with proof-of-concepts and a presentation with leadership and Senior VP
- Performed monthly data audits against 120M+ between applications to identify discrepancies in an effort to avoid GDPR violations
- Deployed ETL pipelines to ingest and upload over 14M+ account PII details from internal billing applications into Salesforce

Software Engineer Intern • United Parcel Service

June 2019 - Sept 2019

- Implemented ETL process to increase lead visibility through mastering anonymous first-party cookie data with existing contact data using Java and MSSQL
- Increased ETL upload rate by 80% by migrating synchronous REST API calls to asynchronous Bulk API calls with Apache Camel and Java
- Developed mobile digital badge application using GCP and Firebase for company Hackathon; awarded High Tech Award and presented product to C/EO

EDUCATION

B.S Computer Science and Mathematics • New Jersey Institute of Technology (NJIT)

May 2019

GPA: 3.85 | **Coursework:** Data Structures and Algorithms, Intensive Programming in Linux
